

Your numbers are already in Business Central. Nobody can read them.

Lens is one live view across every company, location and outlet. Current the moment anyone opens it, governed by role, with nothing rebuilt by hand.

The screenshot shows the LENS application interface. At the top, there's a navigation bar with the LENS logo, a dropdown for 'zfenselabs.com', and another dropdown for 'Culinary Ventures (Sandbox)'. On the right, there are links for 'Admin', 'Avradip Mandal', and 'Sign out'. Below the navigation bar, there's a 'Performance' tab selected, with other tabs like 'Revenue', 'Cost', 'Balance Sheet', 'Cash Flow', 'Reconciliation', 'Trends', and 'Investigate'. The 'Performance' section displays three key metrics: 'GROSS REVENUE' at 2.9M (excl. tax), 'GROSS MARGIN (COGS)' at 62.7%, and 'ACTIVE BUSINESS GROUPS' at 6. Below these, there's a 'Company income statement' section with a table showing line items, percentage of revenue, and amounts. A sidebar on the right allows filtering by location or brand, with a list of brands like Blaze Wing, Clawpoint, Frankly Dogs, Oak & Marble, Rolling Twentytwo, and Verde Blends.

Pick the period, then slice the whole business by brand, location or outlet. Every tab follows the same filters.

"Margin dropped two points. Where?"

Investigate follows the chain to the outlet driving it, down to the cost line, and shows the rows behind every figure.

"Can I get a P&L for one location?"

Already there. Pick the company, location or outlet and every statement re-slices. No new report, nobody to wait for.

"Who is allowed to see what?"

A regional manager sees their branches, a brand head sees their brand, finance sees it all. Granted in clicks.

"Can we point our own AI at it?"

Connect Claude or ChatGPT. Answers come from statements that already tie out, under each person's own access.

RUNNING IN PRODUCTION TODAY 8 business groups, around 125 outlets, one finance team. **Close took two weeks. It now takes two days.**
